Introduction

This assignment is the final project, specifically meant to provide some insight into everything we've learnt so far throughout the term. We studied html, CSS and JavaScript and the goal was to create a five page website with links that connect one page to the next. We needed to include HTML, CSS files and JavaScript, and ensure it follows SEO standards. In this I have attempted to build a site based on some places I have visited. Using the tools we have learned, tutorials and other researched codes I will attempt to build this page as required to fulfill this assignments requests. For this, I also used all my own photographs.

List of elements and tricks used

`<!DOCTYPE>` This describes the type of document.

`<lang>` Attached to `<html>` defines the language.

`<html>` This defines the root of an html document.

`<head>` This expresses that the document contains metadata/information.

`<title>` This is an attribute that defines some extra information about an element.

`<style>` This is used to define style information for a document.

`<body>` This defines the body of the document.

`<form>` Defines an HTML form for user input.

`<input>` Defines an input control.

`<label>` This element defines a label for several form elements.

`<padding>` Defines the space left around objects on the page.

`<a>` This defines a hyperlink.

`<href>` Specifies the URL of the page the link goes to.

`<input>` Used for search fields.

`<button>` Defines clickable button.

`<h1>` This defines html headings.

`` This defines an image.

`<p>` This defines a paragraph.

`<div>` Defines images and containers.

`{font}` This was used to define the font size.

`{}` Defines css code.

`{color}` Defines the color.

`{text-align}` Defines where the text will be placed.

`<p>` Defines a paragraph.

`{id}`

Script and explanation

I started with this code

for all my files.

Part 1

```

Sunshine1.html — Edited
<!DOCTYPE html>

Editing the Code

Part 1

HTML & Javascript

Defining language, headings, and the body of the code. In this part the links for the other pages was also defined.

```

Sunshine1.html — Edited
<!DOCTYPE html>
<html lang='en'>
  <head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <meta http-equiv="X-UA-Compatible" content="ie=edge">
    <link rel="stylesheet" href="./style1.css">
    <title>Places I Enjoy</title>
  </head>
  <body>
    <h1>My Happy Places</h1>
    <a href="Sunshine2.html">St. Lucia</a>
    <a href="Sunshine3.html">Prague</a>
    <a href="Sunshine4.html">Italy</a>
    <a href="Sunshine5.html">Boston</a>
    <h2>Ottawa-Gatineau</h2>
  </body>
</html>

```

In this part, the pictures are defined and links to the photos are added. I've also added the titles and names of the photographed locations.

```
<hr>
  <div class="row">
    <div class="column">
      
      <p>Christmas Market
    </p>
    </div>
    <div class="column">
      
      <p>L'Arc de Triomphe, MacKenzie-King Estate
    </p>
    </div>
    <div class="column">
      
      <p>Rockcliffe Pavilion
    </p>
    </div>
  </div>
</div>
<hr>
```

In this part, I've attempted to add descriptions for the locations and defined the paragraphs. The links were also added here.

```
<p>Christmas Market
</p>
<p>Located in the Aberdeen Square while surrounded by snow-capped heritage buildings and wooden
chalets is the Ottawa Christmas Market presented by TD. Thousands of Christmas lights and decorations
twinkle and sparkle to create that festive atmosphere that is accompanied by holiday entertainment,
local flavours, and, of course, some holiday shopping!
</p>
<div>
  <a href="https://www.ottawachristmasmarket.com/" target="_blank">Ottawa Christmas market</a>
</div>
<hr>
<p>L'Arc de Triomphe
</p>
<p>This is a 'folly' placed in the gardens at Moorside, the former summer home of William Lyon
Mackenzie King, the tenth Prime Minister of Canada, who salvaged architectural features from
demolition sites to decorate the grounds of his summer home located near Kingsmere Lake in the
Gatineau Hills. This large arch was formerly the front entrance of a bank. It was erected in 1936.
</p>
<div>
  <a href="https://www.waymarking.com/waymarks/
WMBFHX_LArc_de_Triomphe_Mackenzie_King_Estate_Gatineau_Park_Quebec">L'Arc de Triomphe</a>
</div>
<hr>
<p>Rockcliffe Pavilion
</p>
<p>The Rockcliffe Pavilion, constructed in 1917, is associated with the Ottawa Improvement
Commission's efforts to create a National Capital of which Canadians could be proud. Located in
Rockcliffe Park, which was established in 1890 at the edge of the city, it constitutes a reminder of
the impact of the park movement on Canadian communities in the early 20th century.
<div>
  <a href="https://www.pc.gc.ca/apps/dfhd/page_fhbrog_eng.aspx?id=6479">Rockcliffe Pavilion</a>
</div>
```

This is the footer I put in with the copyright and format for the footer.

```
<hr>
<div class="footer">
  <p>Photo Copyright: Delia Delice-MacKenzie 2023</p>
</div>
```

This script is JavaScript. I used this script to create a button to create a button that informs on the current date and time. I have also ended the code here and closed with an </html>

```
<script> </script>
<button type="button"
onclick="document.getElementById('demo').innerHTML = Date()">
Click me to display Date and Time.</button>

<p id="demo"></p>

</body>
</html>
```

CSS

In this part of the file the headings, images, and column borders are defined.

```
body {
  background-color: #D3D3D3;
}
h1 {
  color: #000000;
  text-align: center;
  padding: 20px;
}

.images {
  display: flex;
  justify-content: space-around;
}
.row {
  display: flex;
}

.column {
  flex: 33.33%;
  padding: 5px;
}
```

This part of the code outlines the font used and elements for formatting the footer and adding the space for the button and copyright at the bottom of the page.

```
p {
  font-family: verdana;
  font-size: 15px;
}

* {
  box-sizing: border-box;
}

{
  padding-bottom: 30px;
}

.footer {
  position: flex;
  left: 0;
  bottom: 0;
  width: 100%;
  color: black;
  text-align: center;
}
```

Part 2

HTML & Javascript

For this file I did the exact same thing as the previous file. I did the html and javascript in the same file and added css in a separate file. The only think I changed is the title of the page and the links that go to the other pages.

```
<!DOCTYPE html>
<html lang='en'>
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <meta http-equiv="X-UA-Compatible" content="ie=edge">
  <link rel="stylesheet" href="./style2.css">
  <title>Places I Enjoy</title>
</head>

<body>
  <h1>My Happy Places</h1>
  <a href="Sunshine1.html">Ottawa-Gatineau</a>
  <a href="Sunshine3.html">Prague</a>
  <a href="Sunshine4.html">Italy</a>
  <a href="Sunshine5.html">Boston</a>
```

Here, I used different photos and defined their parameters.

```
<h2>St. Lucia</h2>
<hr>
  <div class="row">
    <div class="column">
      
      <p>Soufrière Drive-through Volcano
    </p>
    </div>
    <div class="column">
      
      <p>Pitons Management Area
    </p>
    </div>
    <div class="column">
      
      <p>The Brig Unicorn
    </p>
    </div>
  </div>
<hr>
```

I changed the descriptions for the different photos and defined their parameters.

```

  <p>Soufrière Drive-through Volcano
</p>
  <p>The Soufrière Volcanic Centre is located near the town of Soufrière in southwest Saint Lucia.
This is the youngest and only 'live' (likely to erupt again) volcanic centre in the island. About
30,000 years ago violent, large explosive eruptions generated large pyroclastic flows and extensive
ashfall.
</p>
  <div>
    <a href="https://uwiseismic.com/island-profiles/st-lucia/
#:~:text=The%20Soufrie%20Volcanic%20Centre%20is,pyroclastic%20flows%20and%20extensive%20ashfal
l." target="_blank">Soufrière Volcanic Centre</a>
  </div>
<hr>
  <p>Pitons Management Area
</p>
  <p>The 2,909-ha site near the town of Soufrière includes the Pitons, two volcanic spires rising
side by side from the sea (770 m and 743 m high respectively), linked by the Piton Mitre ridge. The
volcanic complex includes a geothermal field with sulphurous fumeroles and hot springs. Coral reefs
cover almost 60% of the site's marine area. A survey has revealed 168 species of finfish, 60 species
of cnidaria, including corals, eight molluscs, 14 sponges, 11 echinoderms, 15 arthropods and eight
annelid worms. The dominant terrestrial vegetation is tropical moist forest grading to subtropical
wet forest, with small areas of dry forest and wet elfin woodland on the summits. At least 148 plant
species have been recorded on Gros Piton, 97 on Petit Piton and the intervening ridge, among them
eight rare tree species. The Gros Piton is home to some 27 bird species (five of them endemic), three
indigenous rodents, one opossum, three bats, eight reptiles and three amphibians.
</p>
  <div>
    <a href="https://whc.unesco.org/en/list/1161/">Pitons Management Area</a>
  </div>
<hr>
  <p>The Brig Unicorn
</p>
  <p>The Brig Unicorn was used in the filming of all three Pirates of the Caribbean movies as well
as in the series Roots. The Unicorn was built in Finland in 1948. For some time, the 148-foot long
vessel had been docked on the Rodney Bay Marina in St. Lucia. The ship has been in St. Lucia since
1980, serving most recently as a bar and restaurant in Rodney Bay Marina.
  <div>
    <a href="https://www.uncommoncaribbean.com/st-lucia/uncommon-attraction-the-brig-unicorn-
pirate-ship/">The Brig Unicorn</a>
  </div>
<hr>
```

I added the footer and copyright.

```
<div class="footer">
  <p>Photo Copyright: Delia Delice-MacKenzie 2023</p>
</div>
```

Here, I added the Javascript and closed off the code.

```
<script></script>
<button type="button"
onclick="document.getElementById('demo').innerHTML = Date()">
Click me to display Date and Time.</button>

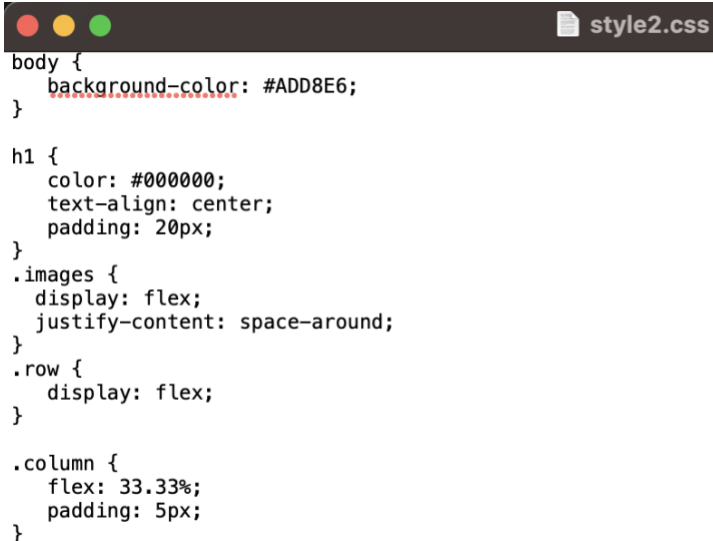

<p id="demo"></p>

</body>

</html>
```

CSS

For this part, I changed the color code.

```
body {
  background-color: #ADD8E6;
}

h1 {
  color: #000000;
  text-align: center;
  padding: 20px;
}

.images {
  display: flex;
  justify-content: space-around;
}

.row {
  display: flex;
}

.column {
  flex: 33.33%;
  padding: 5px;
}
```

```

p {
  font-family: verdana;
  font-size: 15px;
}

* {
  box-sizing: border-box;
}

{
  padding-bottom: 30px;
}

.footer {
  position: flex;
  left: 0;
  bottom: 0;
  width: 100%;
  color: black;
  text-align: center;
}

```

Part 3

HTML & Javascript

For this file I did the exact same thing as the previous file. I did the html and javascript in the same file and added css in a separate file. The only think I changed is the title of the page and the links that go to the other pages.

```

<!DOCTYPE html>
<html lang='en'>

<head>
<meta charset="UTF-8">
<meta name="viewport" content="width=device-width, initial-scale=1.0">
<meta http-equiv="X-UA-Compatible" content="ie=edge">

<title>Places I Enjoy</title>
</head>

<body>
<h1>My Happy Places</h1>
<a href="Sunshine1.html">Ottawa-Gatineau</a>
<a href="Sunshine2.html">St. Lucia</a>
<a href="Sunshine4.html">Italy</a>
<a href="Sunshine5.html">Boston</a>
<h2>Prague</h2>
<hr>

```

```

<div class="row">
  <div class="column">
    
    <p>Prague
  </p>
  </div>
  <div class="column">
    
    <p>Kafka Museum
  </p>
  </div>
  <div class="column">
    
    <p>Astronomical Clock
  </p>
  </div>
  <div class="column">
    
    <p>St. Vitus Cathedral
  </p>
  </div>
</div>
<hr>

```

```

    <p>Prague
  </p>
  <p>Prague, Czech Praha, city, capital of the Czech Republic. Lying at the heart of Europe, it is one
  of the continent's finest cities and the major Czech economic and cultural centre. The city has a
  rich architectural heritage that reflects both the uncertain currents of history in Bohemia and an
  urban life extending back more than 1,000 years.
  </p>
  <div>
    <a href="https://www.britannica.com/place/Prague">Prague</a>
  </div>
  <hr>
  <p>Kafka Museum
  </p>
  <p>The Franz Kafka Museum opened in the summer of 2005 in the remarkable Herget Brickworks
  building on the Lesser-Town bank of the Vltava River.
  Franz Kafka was born in Prague on 3 July 1883, died in a sanatorium in Kierling on 3 June 1924, and
  was buried in the New Jewish Cemetery in Prague – Strašnice on 11 June.
  </p>
  <div>
    <a href="https://kafkamuseum.cz/en/">Kafka Museum</a>
  </div>
  <hr>

  <p>Astronomical Clock
  </p>
  <p>The mediaeval tower clock is located at the southern side of the Old Town Hall Tower. When the
  clock strikes the hour (from 9.00 a.m. to 11.00 p.m.), the procession of the Twelve Apostles sets in
  motion. The parade of the Apostles is visible from the Old Town Square. If you want to see them
  better, we recommend you to buy a ticket to the Old Town Hall, where you can admire them from the
  tower's chapel.

  The astronomical clock was placed at the front side of the tower in 1410. At the southern part of the
  tower a special stone chamber was built for its mechanical part. The astronomical clock consists of
  different parts – such as a calendar and an astronomical desk or the mechanism of twelve apostles
  which sets them in motion.

  During the apostles' parade, other figures placed on the sides of the astronomical clock set in
  motion too. The skeleton rings, rotates an hourglass in order to show to the Turk that his lifetime
  is at the end. He shakes his head. The Vain Man and the Miser behave similarly.
  </p>
  <div>
    <a href="https://www.prague.eu/en/object/places/3129/astronomical-clock">Astronomical Clock</a>
  </div>
  <hr>

  <p>St. Vitus Cathedral
  </p>
  <p>The Gothic Cathedral is an exceptional achievement. The structure, dark with age and solemnity,
  was meant not only as the principle church of the Castle but also as the spiritual centre of the
  whole country.

  The original Romanesque Rotunda of St. Vitus was founded in the second decade of the 10th century
  by St. Wenceslas in order to house a gift from Emperor Henry the Fowler, the shoulder of St. Vitus, a
  defender of the Holy Roman Empire and henceforth also a patron saint of Bohemia. He built it on the
  highest place in Prague Castle and by doing so he determined forever the layout of the secular and
  religious buildings in the third courtyard. The Romanesque Rotunda, where St. Wenceslas himself was
  buried and also St. Vojtěch the second Prague bishop, was soon unable to accommodate all the
  believers visiting the holy relics. Prince Spytihněv had it demolished and in its place started to
  build a 70 metre long basilica, completed in the reign of his successor Prince Vratislav II who was
  crowned Bohemian King here in 1085. In the basilica other rulers were also crowned, the last one
  being John of Luxembourg and his wife Eliška Přemislid. Their son Wenceslas was christened in the
  Cathedral, and later at his confirmation accepted the name Karel (Charles). It is Charles as king and
  emperor, who deserves recognition for the building of the Gothic Cathedral.
  </p>
  <div>

Part 4

HTML & Javascript

For this file I did the exact same thing as the previous file. I did the html and javascript in the same file and added css in a separate file. The only thing I changed is the title of the page and the links that go to the other pages.

```
<p>Padua
</p>
<p>Padua, Italian Padova, Latin Patavium, city, Veneto region, northern Italy, on the River
Bacchiglione, west of Venice. The Roman Patavium, founded, according to legend, by the Trojan hero
Antenor, it was first mentioned in 302 BCE, according to the Roman historian Livy, who was born there
(59 BCE). The town prospered greatly and, in the 11th–13th century, was a leading Italian commune.
The poet Dante lived there, and St. Anthony of Padua is buried there. It was governed by the Carrara
family from 1318 to 1405, when it passed to Venice, which held it until 1797. Under Austrian dominion
from 1815 to 1866, it was active in the Risorgimento (movement for Italian independence); a rising
took place there in February 1848. It was heavily bombed in World War II, and the frescoes by Andrea
Mantegna in the Church of the Eremitani were almost completely destroyed.
<div>

Part 5

HTML & Javascript

For this file I did the exact same thing as the previous file. I did the html and javascript in the same file and added css in a separate file. The only think I changed is the title of the page and the links that go to the other pages.

```

Sunshine5.html
<!DOCTYPE html>
<html lang='en'>

<head>
<meta charset="UTF-8">
<meta name="viewport" content="width=device-width, initial-scale=1.0">
<meta http-equiv="X-UA-Compatible" content="ie=edge">
<link rel="stylesheet" href="./style5.css">
<title>Places I Enjoy</title>
</head>

<body>
<h1>My Happy Places</h1>
<a href="Sunshine1.html">Ottawa-Gatineau</a>
<a href="Sunshine2.html">St. Lucia</a>
<a href="Sunshine3.html">Prague</a>
<a href="Sunshine4.html">Italy</a>

<h2>Boston</h2>
<hr>
<div class="row">
  <div class="column">
    
    <p>Boston Commons
  </p>
  </div>
  <div class="column">
    
    <p>Massachusetts State House
  </p>
  </div>
  <div class="column">
    
    <p>Boston Seaport
  </p>
  </div>
</div>
<hr>

```

```

    <p>Boston Common
  </p>
  <p>Founded in 1634. Here the Colonial militia mustered for the Revolution. In 1768, the hated
  British Redcoats began an eight-year encampment. George Washington, John Adams and General Lafayette
  came here to celebrate our nation's independence. The 1860s saw Civil War recruitment and anti-
  slavery meetings. During World War I, victory gardens sprouted. For World War II, the Common gave
  most of its iron fencing away for scrape metal.

  Boston Common continues to be a stage for free speech and public assembly. Here, during the 20th
  century, Charles Lindbergh promoted commercial aviation. Anti-Vietnam War and civil right rallies
  were held, including one led by Martin Luther King, Jr. In 1979, Pope John Paul II celebrated Mass.
</p>
  <div>
    <a href="https://www.boston.gov/parks/boston-common" target="_blank">Boston Common</a>
  </div>
<hr>
  <p>Massachusetts State House
</p>
  <p>With its golden dome clearly visible atop Beacon Hill, the Massachusetts State House sits at
  the western edge of the Boston Common. Charles Bulfinch designed this monumental building, which
  completed construction in 1798. The Massachusetts State House serves as the home for the State
  Senate, House of Representatives, and Governor's Office. Inside, murals, statues and governors'
  portraits illustrate the state's history.

  Since its completion, the Massachusetts State House has been a site of debate and discussion.
  Representatives and members of the public have grappled with the essential principles of justice,
  liberty, and representation. Those who first struggled to gain access to the building still found
  ways to ensure their voices would be heard within its walls. Black and White abolitionists petitioned
  for the end of slavery and against the 1850 Fugitive Slave Law. African Americans petitioned for
  equal access to education, leading to the State Legislatures' ban on segregated education in 1855.
  Women petitioned for greater civil rights, most importantly, the right to vote.
</p>

  State House</a>
  </div>
<hr>
  <p>Boston Seaport
</p>
  <p>In the heart of a city so revered for its history, Seaport is a beacon of all things new and
  unexpected. It's a home for technology, innovation, art and doing things a little differently. It's a
  neighborhood for what's new and what's next.

  Step into Seaport – nestled between Boston's scenic waterfront and the historic Fort Point District –
  and you'll feel the energy shift. There's a little more excitement, a little extra style and a sense
  that something interesting is just around the corner. Like your most well-traveled, in-the-know
  friend, Seaport is always up on the latest, down to try something new and guaranteed to look good
  through it all.

</div>

```

```

</script></script>
<button type="button"
onclick="document.getElementById('demo').innerHTML = Date()">
Click me to display Date and Time.</button>

<p id="demo"></p>

</body>

```

CSS

```

body {
  background-color: #FAF0E6;
}

h1 {
  color: #000000;
  text-align: center;
  padding: 20px;
}

.images {
  display: flex;
  justify-content: space-around;
}

.row {
  display: flex;
}

.column {
  flex: 33.33%;
  padding: 5px;
}

p {
  font-family: verdana;
  font-size: 15px;
}

* {
  box-sizing: border-box;
}

{
  padding-bottom: 30px;
}

.footer {
  position: flex;
  left: 0;
  bottom: 0;
  width: 100%;
  color: black;
  text-align: center;
}

```

Conclusion

In conclusion, I used the text we have learned so far, tutorials and research websites to build this website. I am having some difficulty changing the path from “file” to “http”. Overall, it has worked quite nicely but more work can be done. I have also had some difficulty with Javascript and need more practice with it. This was a bit overwhelming compared to the previous assignments, but it has become fun. Thank you.
